

PHILIP MORRIS INCORPORATED
LAW DEPARTMENT MEMORANDUM
RICHMOND, VIRGINIA

TO: C. Chavdarian
DATE: 4 September 1979
FROM: S. Hutcheson
SUBJECT: PM 883 CHIRAL NICOTINE ANALOGS AND PROCESS FOR THEIR PRODUCTION

Attached is a copy of the proposed patent application prepared by George Depaoli. His transmittal letter is also attached for your information.

Please note that Mr. Depaoli feels that comparative examples of insecticidal activity of 4- and 6-substituted compounds relative to the claimed compounds would be helpful. As you are probably aware, all of the compounds in question should be tested in the same run even though this represents some repetition.

Please note the last paragraph of Mr. Depaoli's letter regarding additional data. In view of his comments, I recommend that additional data be generated and that it be done on a priority basis, if possible, so that the application can be filed with minimal delay.

I will be anxious to discuss the application with you once you've had a chance to review it.
